

NETWORK POWER IN MOTION FOR GROWING BUSINESSES

THE CISCO® NETWORK ON WHEELS (NOW) PROGRAM

These 25-foot mobile demonstration showcases are equipped with the latest Cisco networking technologies. Created specifically for small and medium businesses (SMBs), these vans feature hands-on demonstrations highlighting Security, Mobility, IP Communications, and Network Foundation solutions.

Through the use of customized demonstrations, participants will experience first hand how Cisco solutions and services address their specific needs. These demos are designed for maximum impact and represent right-sized, whole solutions that solve SMB challenges.

CISCO® NETWORK ON WHEELS SHOWCASES THE FOLLOWING SOLUTIONS:

(See back for network diagram)

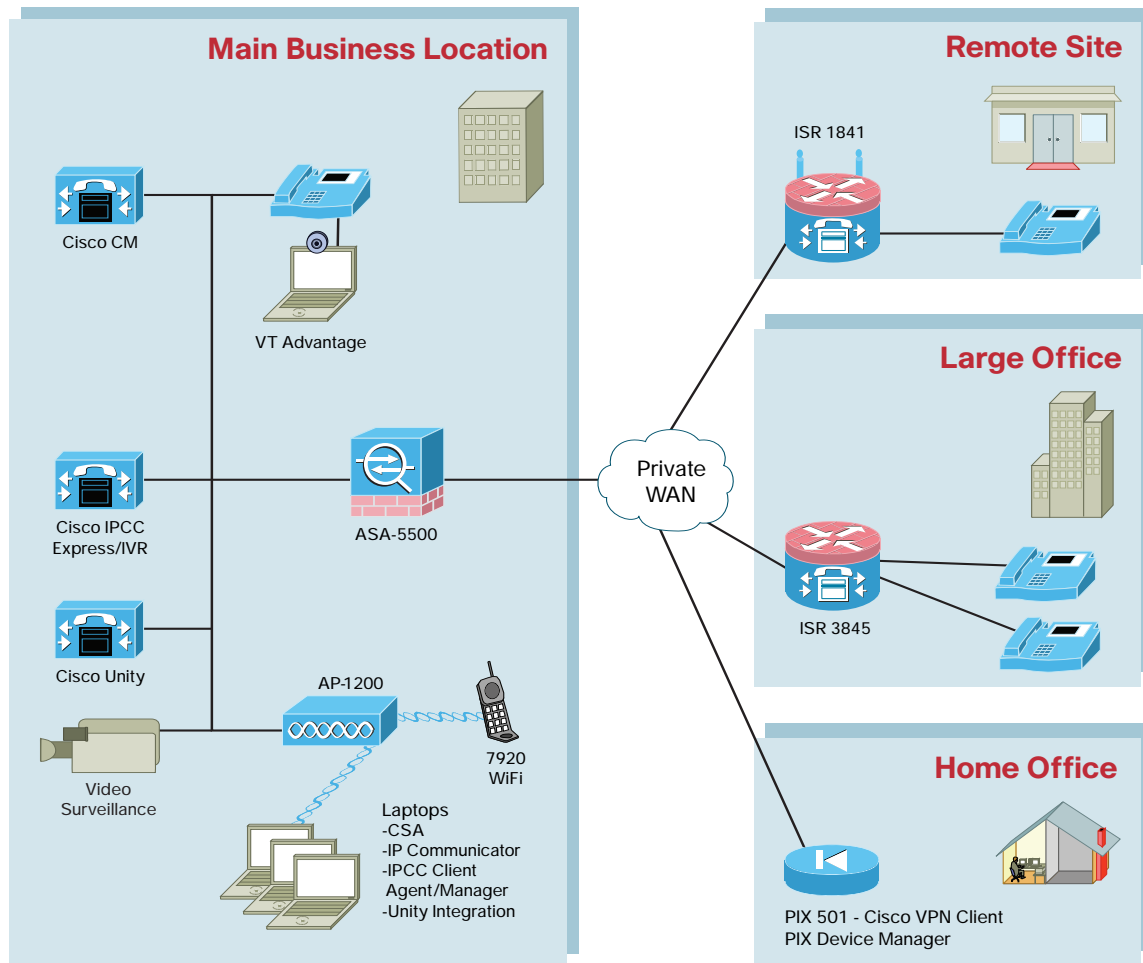

- **Security Solutions**—Safeguard your business with integrated network security
- **IP Communications Solutions**—Lower costs and expand business capabilities by adding voice and video to your data network
- **Mobility Solutions**—Increase organizational productivity and reduce expenses while in the office, on the road, or at home
- **Network Foundation Solutions**—Provide a strong infrastructure to support the evolution of your business by ensuring network security, reliability, and flexibility for business applications
- **Management Applications**—Simplify the network and enhance productivity by making your network easy to use and manage

The Cisco Network on Wheels vans will be traveling throughout the continental United States during 2005 and 2006, serving the recently established commercial regional areas. Come on board and experience how powerful your network can be.
